S. Patent and Trademark Office O-326 (Rev. 9-97)

Part of Paper No. 17

Art Unit: 1742

#### **DETAILED ACTION**

### Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 4-7, 10-13, and 16-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6258317. Although the conflicting claims are not identical, they are not patentably distinct from each other because the alloy compositions in instant claims are overlapped by the alloy compositions of said patent.

# Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112: The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

-3-

Serial No: 09/148,749

Art Unit: 1742

4. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 19 is indefinite because the lower limits of silicon and yttrium contents are apparent typographical errors.

## Claim Rejections - 35 USC § 103

- 6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
  - 1. Determining the scope and contents of the prior art.
  - 2. Ascertaining the differences between the prior art and the claims at issue.
  - 3. Resolving the level of ordinary skill in the pertinent art.
  - 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).
- 8. Claims 1, 4-7, 10-13, and 16-20 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. § 103 as being unpatentable

-4-

Serial No: 09/148,749

Art Unit: 1742

over USP 4764225 to Shankar et al (col. 3, lines 7-50 and col. 4, lines 8-24), USP 5780116 to Sile et al (col. 7, line 45 to col. 8., line 30), or USP 3015558 to Grant (col. 2, lines 5-54).

- 9. Claims 1 and 4-6 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. § 103 as being unpatentable over USP 5900078 to Yakuwa et al (col. 2, lines 20-61 and col. 4, lines 11-66).
- 10. The cited references disclose the features substantially as claimed. The disclosed features include the claimed Ni-Cr-Co alloy. Therefore, the subject matter as a whole would have been obvious to one having ordinary skill in the art at the time the invention was made to have selected the overlapping portion of the subject matter disclosed by the reference. Overlapping ranges have been held to be a prima facie case of obviousness, See MPEP § 2112.01, In re Best, 195 USPQ 430, In re Malagari, 182 USPQ 549, In re Titanium Metals Corporation of America v. Banner, 227 USPQ 773 (Fed. Cir. 1985), In re Woodruff, 16 USPQ 2d 1934, and In re Wertheim, 541 F.2d 257, 191 USPQ 90 (CCPA 1976).
- 11. Grant teaches about 28-45 wt.% Cr which is about the same as claimed Cr contents (instant claims 4, 7, and 10 about 27 wt.% Cr; claim 19 about 26 wt.% Cr). In re Preda, 159 USPQ 342 and In re Ayers, 154 F 2d 182, 69 USPQ 109 (CCPA 1946). Moreover, it is well settled that a prima facie case of obviousness would exist

-5-

Serial No: 09/148,749

Art Unit: 1742

where the claimed ranges and prior art do not overlap but are close enough that one skilled in the art would have expected them to have the same properties, In re Titanium Metals Corporation of America v. Banner, 227 USPQ 773 (Fed. Cir. 1985), In re Woodruff, 16 USPQ 2d 1934, and In re Aller, 105 USPQ 233.

- 12. With respect to the N content in claim 1, that the claimed N content reads on zero, which suggests N could be eliminated from the claimed alloy.
- 13. With respect to the N content in claims 7 and 13, that the claimed N contents read on trace or impurity amount that would diffuse into the alloy during casting under N insert atmosphere or ambient atmosphere. Nonetheless, Grant in col. 2, lines 37-41 teaches N could be added as optional element to form nitrides (paragraph bridging col. 9-10). It has been held that combining known ingredient having known functions, to provide a composition having the additive effect of each of the known functions is within realm of performance of skilled artisan and is not a patentable subject matter. In re Castner, 186 USPQ 213 (217). The use of conventional materials to perform their known functions in a conventional process is obvious. In re Raner, 134 USPQ 343 (CCPA 1962).

## Response to Arguments

14. Applicant's arguments filed February 4, 2002 have been fully considered but

Art Unit: 1742

they are not persuasive.

- 15. Applicants' argument in pages 5 and 6 is noted. However, criticalities of elements' contents must be established by factual evidence. Mere argument or conclusory statements in the specification is not sufficient. In re Geisler, 116 F.3d at 1470. Comparison must be done under identical condition except for the novel features of the invention. In re Brown, 173 USPQ 685 and In re Chapman, 148 USPQ 711. The showing of unexpected results must be occurred over the entire claimed range. In re Clemens, 622 F.2d 1029, 206 USPQ 289, 296 (CCPA 1980). The scope of the showing must be commensurate with the scope of the claims. In re Tiffin, 448 F.2d 791, 792 (Fed. Cir. 1971), In re Coleman, 205 USPQ 1172, and In re Greenfield, 197 USPQ 227.
- 16. Applicants' argument with respect to Shankar in paragraph bridging pages 6-7 of the instant remarks is noted. But, overlapping ranges have been held to be a prima facie case of obviousness, See In re Best, 195 USPQ 430, In re Malagari, 182 USPQ 549, In re Titanium Metals Corporation of America v. Banner, 227 USPQ 773 (Fed. Cir. 1985), In re Woodruff, 16 USPQ 2d 1934, and In re Wertheim, 541 F.2d 257, 191 USPQ 90 (CCPA 1976).
- 17. Applicants argue that Shankar does not disclose the criticality of the Zr, Y, Ti, Mo, Co, Cr ranges for the corrosion properties in various environments. First, there

-7-

Serial No: 09/148,749

Art Unit: 1742

is no factual evidence that the claimed element range is critical. Second, the alloy of Shankar is directed to reduce oxidation and hot corrosion resistance (see abstract and col. 3, lines 7-35).

- 18. Applicants argue that the Mo content (up to 4 wt.%) of Sileo is outside the claimed range (4.5 wt to 9.5 wt.%, claim 1 for example). Thus, there is no prima facie obviousness. However, it is well settled that a prima facie case of obviousness would exist where the claimed ranges and prior art do not overlap but are close enough that one ordinary skilled in the art would have expected them to have the same properties, In re Titanium Metals Corporation of America v. Banner, 227 USPQ 773 (Fed. Cir. 1985), In re Woodruff, 16 USPQ 2d 1934, and In re Aller, 105 USPQ 233.
- 19. Applicants argue that alloy of Grant does not contain Zr or Y. Applicants' attention is directed to col. 2, lines 46-48 which disclose Zr content from effective amount to about 0.3 wt.%. and lines 45-46 disclose rare earth elements up to about 0.2 wt.%. Ordinary skill artisan knows Y is one of the rare earth.

20.

21. Applicants argue that the claimed 21.5 wt.% Cr in instant claim 1 does not overlap with 21 wt.% as disclosed by Yakuwa. However, it is well settled that a prima facie case of obviousness would exist where the claimed ranges and prior art do not

Art Unit: 1742

overlap but are close enough that one skilled in the art would have expected them to have the same properties, In re Titanium Metals Corporation of America v. Banner, 227 USPQ 773 (Fed. Cir. 1985), In re Woodruff, 16 USPQ 2d 1934, and In re Aller, 105 USPQ 233.

22. Applicants' argument in page 9 of the instant remarks is noted. But, the different of Mo content is not merely 0.05 wt.% different in the Titanium Metals Corporation case. In fact, it is 20% different (0.05 wt.% / 0.25 wt.% x 100%). For the instant case, the difference between the claimed Cr (21.5 wt.%) and Cr from Yakuwa (21 wt.%) is less than 2.4% which is much less than 20% as in said court case.

#### Conclusion

The above rejection relies on the reference(s) for all the teachings expressed in the text(s) of the references and/or one of ordinary skill in the metallurgical art would have reasonably understood or implied from the text(s) of the reference(s). To emphasize certain aspect(s) of the prior art, only specific portion(s) of the text(s) have been pointed out. Each reference as a whole should be reviewed in responding to the rejection, since other sections of the same reference and/or various combination of the cited references may be relied on in future rejection(s) in view of amendment(s).

All recited limitations in the instant claims have been meet by the rejections as set forth above.

Applicant is reminded that when amendment and/or revision is required, applicant should therefore specifically point out the support for any amendments made to the disclosure. See MPEP § 2163.06 (a) and 37 C.F.R. § 1.121.

Art Unit: 1742

### Examiner Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Ip whose telephone number is (703) 308-2542. The examiner can normally be reached on Monday to Friday from 5:30 Å.M. to 2:00 P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Roy V. King, can be reached on (703)-308-1146.

The facsimile phone numbers are (703) 872-9310 (non-final Official Paper only), (703) 872-9311 (after-final Official Paper only), and (703) 305-7719 (Unofficial Paper only). When filing a FAX in Technology Center 1700, please indicate in the Header (upper right) "Official" for papers that are to be entered into the file, and "Unofficial" for draft documents and other communication with the PTO that are not for entry into the file of the application. This will expedite processing of your papers.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0651.

SIKYIN IP PRIMARY EXAMINER

**ART UNIT 1742** 

S. Ip April 19, 2002
